## WORK EXPERIENCE

---

### Tantalus Systems

Sep. 2018 – Apr. 2019

*Test Automation Developer*

*Burnaby, BC*

- Proposed, implemented and documented new inventory management system for tracking over 2000 in-house smart meter devices using Bluetooth barcode scanners, which allowed the QA team to track devices an order of magnitude faster
- Fixed a number of failing test suites, added new ones for different products in time for user conference, so that the QA team could present results
- Gathered requirements for testing of software for programming devices in the field, updated the regression test suite, and conducted tests, enabling the software's release
- Worked in an Agile team utilizing weekly sprints, sprint planning, timeboxing, and retrospectives; daily standup meetings

## SKILLS

---

- **Languages:** Python, JavaScript, Java, SQL, HTML, CSS, C++
- **Technologies / Frameworks:** React, Node.js, npm, Git, Jira, Confluence, Slack, Postman, Heroku, REST, Bootstrap, Express, jQuery, EJS, Jekyll, Amazon S3, Linux, shell scripting, Jenkins, Selenium

## PROJECTS

---

### Deaf-fire-art.herokuapp.com (sole developer and designer)

- Built small business website for client that allows them to upload images of their work and have customers contact them through the site
- Features an image gallery page including a lightbox display; image uploading and editing only accessible via authentication
- Used Node and Express on backend, hosted on Heroku, MySQL DB containing URLs of images stored in S3 bucket; assorted useful packages installed from npm

### In-it-to-winnik.herokuapp.com (sole developer and designer; in progress)

- For my fantasy hockey league, used Yahoo's Fantasy Sports API along with NHL.com's API in order to gather interesting statistics about each fantasy team, and give league mates more information than Yahoo provides
- This project is mainly about figuring out the correct database design, and organizing the web app such that flexible searches over the data may be supported and visualized on the frontend

## EDUCATION

---

### University of Victoria

May, 2020

*BSc, Computer Science*

*Victoria, BC*

- 3.8/4.0 GPA

## INTERESTS

---

- **Interests:** Meeting new people; electronic music; running; working out; travelling; self-discovery; the Great Outdoors; fantasy sports; Reddit; beer; Seinfeld; configuring my dotfiles
